

Thread Guide for Schlafhorst Autoconer 238/338:

Gap (T) 0.5
normally
recommended
for coarser yarns
up to Ne 40

Gap (T) 0.3
normally
recommended
for yarns finer
than Ne 40

Advantages:

- The pin projection is exactly bound due to the accurate metal sheets.
- Through the special design of the thread guide its weight could be reduced by more than 30 %, whereby the suction arm load is reduced significantly.
- High quality for a fair price!
